

 **The Mighty River
Waikato**
FROM HINAKI TO HYDROPOWER

On Now at the Waikato Museum

This exhibition explores the amazing world of the Waikato River. Discover the stories our river holds, and how people in our community are restoring the health of our great natural resource.

The **Mangakotukutuku Stream Care Group** are doing their bit. The Mangakotukutuku stream flows through Hamilton, and enters the Waikato River. It is home to a wide variety of native stream life. This group are protecting this stream life, and improving the parts of the stream that currently need help. You can help too!

To find out more visit The *Mighty River Waikato* exhibition now on at the Waikato Museum
